-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 28 AUG. 2001.

2a) This action is **FINAL**. 2b) This action is non-final.

3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4) Claim(s) 1 - 13 is/are pending in the application.
4a) Of the above claim(s) _____ is/are withdrawn from consideration.

5) Claim(s) _____ is/are allowed.

6) Claim(s) 1 - 13 is/are rejected.

7) Claim(s) _____ is/are objected to.

8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9) The specification is objected to by the Examiner.

10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) All b) Some * c) None of:
1. Certified copies of the priority documents have been received.
2. Certified copies of the priority documents have been received in Application No. _____.
3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) Notice of References Cited (PTO-892)
2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date 8 AUG. 01.
4) Interview Summary (PTO-413)
Paper No(s)/Mail Date. ____.
5) Notice of Informal Patent Application (PTO-152)
6) Other: ____.

DETAILED ACTION

1. This action is responsive to the application filed on Aug. 28, 2001. Claims 1 – 13 are pending examination.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 – 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Fields et al. U.S. Patent No. 6,412,008 (referred to hereafter as Fields).

As to claim 1, Fields teaches An Intranet site constructing system comprising: an Internet server which provides an Internet site(see col. 4 lines 1 – 14, and fig.1 Fields discloses proxy server) ; a constructing apparatus which constructs an Intranet site based on the Internet site provided by said Internet server(see col.2 lines 40 – 46, and fig. 1 Fields discloses customization of web page) ; and

an Intranet server which provides the Intranet site constructed by said constructing apparatus(see col. 3 lines 43 – 55 fields discloses a server), wherein said constructing apparatus includes:

a downloader which downloads the Internet site provided by said Internet server, from said Internet server via a network (see col.4 lines 15 – 30 and fig. 2, Fields discloses downloading a file); and

a processor which produces the Intranet site having a same mechanism as that of the Internet site downloaded by said downloader, by processing the Internet site (see col. 4 lines 31 – 41 , Fields discloses a web browser displaying web page).

As to claim 2, Fields teaches the Intranet site constructing system according to claim 1, wherein said constructing apparatus further includes an installer which installs the Intranet site produced by said processor in said Intranet server (see col. 5 lines 36 – 52 , Fields discloses customizing a request and return customized information to client).

As to claim 3, Fields teaches the Intranet site constructing system according to claim 2, wherein said downloader downloads a program and/or data necessary for producing the Intranet site having the same mechanism as that of the internet site from said internet server (see col. 4 lines 51 – 64, fields discloses customizing file according to corporate options).

As to claim 4, Fields discloses the intranet site constructing system according to claim 3, wherein said processor adds original data usable within an Intranet to the data downloaded by said downloader (see col. 4 lines 51 – 64, fields discloses customizing file according to corporate options).

As to claim 5, Fields teaches an Intranet site constructing apparatus comprising: a downloader which downloads an internet site provided by an internet server from

said Internet server via a network (see col.4 lines 1 – 14 , and fig. 1 , Fields discloses proxy server); and

a processor which produces an Intranet site having a same mechanism as that of the Internet site downloaded by said downloader, by processing the internet site (see col. 4 , lines 31 – 41 fields discloses a browser displaying a web page) .

As to claim 6, Fields teaches the Intranet site constructing apparatus according to claim 5, further comprising an installer which installs the Intranet site produced by said processor in an Intranet server (see col. 4 lines 15 – 30) .

As to claim 7, Fields teaches the Intranet site constructing apparatus according to claim 6, wherein said downloader downloads a program and/or data necessary for producing the Intranet site having the same mechanism as that of the Internet site from said Internet server (see co. 4 lines 51 – 64 Fields discloses customizing of file according to corporate options).

As to claim 8, Fields teaches the Intranet site constructing apparatus according to claim 7, wherein said processor adds original data usable within an Intranet to the data downloaded by said downloader (see col. 5 lines 36 – 52, Fields discloses customizing a request and return customized information to client).

As to claim 9 an Intranet site constructing method comprising:
downloading an Internet site provided by all Internet server from said Internet server via a network(see col.4 , lines 15 – 30 fields discloses downloading of a file); and
producing an Intranet site having a same mechanism as that of the downloaded

Internet site by processing the Internet site (see col. 4 lines 31 – 41 Fields discloses web browser displaying web page).

As to claim 10, Fields teaches the Intranet site constructing method according to claim 9, further comprising installing the Intranet site in an Intranet server (see col. 5 lines 36 – 52, Fields discloses customizing request and a return of customized information to client).

As to claim 11, Fields teaches the Intranet site constructing method according to claim 10, wherein said downloading includes downloading a program and/or data necessary for producing the Intranet site having the same mechanism as that of the Internet site from said Internet Server (see col.4, lines 51 – 64, Fields discloses customizing of file according to corporate options).

As to claim 12, Fields teaches the Intranet site constructing method according to claim 11 wherein said producing includes adding original data usable within an Intranet to the downloaded data (see col. 5 lines 36 – 52, Fields discloses customizing a request and return customized information to client).

As to claim 13, Fields teaches a program for controlling a computer to function as an Intranet site constructing apparatus comprising:

a downloader which downloads at Internet site provided by an Internet server from said Internet server via a network(See col. 15 – 30 and fig. 2 , Fields Discloses downloading of a file); and

a processor which produces at Intranet site having a same mechanism as that of the Internet site downloaded by said downloader, by processing the Internet site (see col. 4 lines 31 – 41 Fields discloses web browser displaying web page).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Content Modification of Internet Web pages for a television Class display by Beranek et al. U.S. Patent No. 6,226,642.
- Web Document Based graphical User Interface by Van Hoff U.S. Patent No. 5,802,530.
- Systems, Methods And computer Programs Products For Assigning, Generating And delivering Content To Intranet Users by Baber et al. U.S. Patent No 6,564,260 .

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sargon N Nano whose telephone number is (571) 272-4007. The examiner can normally be reached on 8 hour.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ario Etienne can be reached on (571) 272-4001. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
